EXPERIENCE

E-Commerce / Web Coordinator, Joyalukkas US Inc | Since July 2024

- Oversaw the launch of Joyalukkas Jewellery's e-commerce operations in the USA, successfully establishing a digital presence for the multinational brand.
- Collaborated with global development and QA teams, ensuring optimal website functionality, security, and performance in line with strategic business goals.
- Led UX research and analysis across multiple sprints, delivering data-driven recommendations that enhanced site design and usability.
- Managed logistics for jewellery inventory worth over USD 4M, maintaining the product catalog accurately on Adobe Commerce (Magento Open Source).
- Leveraged Generative AI tools to automate routine workflows, increasing operational efficiency and team productivity.

UX Designer / Web Developer, Freelancer | March 2022 - Present

- Created customized UX design strategies in collaboration with diverse clients to boost user engagement and conversion rates.
- Conducted user research and produced wireframes, mockups, and interactive prototypes using Figma, Sketch, and Adobe XD to design intuitive, high-impact user interfaces.
- Built and maintained responsive web applications with HTML, CSS, JavaScript, Tailwind CSS, ReactJS, and NextJS, ensuring accessibility compliance and seamless cross-browser performance.
- Delivered responsive, user-focused web solutions using CMS platforms such as Joomla and WordPress, tailored to client needs across a range of industries.

Front-End UI Developer, Beewell Natural Foods | July 2018 - Feb 2022

- Developed responsive, high-performance websites using React JS, HTML, CSS, and JavaScript, with a focus on cross-browser compatibility and performance optimisation with Amazon Web Services (AWS)
- Built reusable React components and managed application state using React Hooks and Context API, enhancing code maintainability and speeding up development cycles.
- Led UI/UX enhancements using Figma, resulting in a 150% increase in returning customer rate through improved visual design and user flow.
- Implemented inclusive, customer-centric UI designs aligned with WCAG accessibility standards, significantly improving usability for all users.

Full Stack Developer, Platerate.Com | July 2017 - June 2018

- Collaborated in a dynamic startup environment, working with cross-functional teams under Agile methodologies to deliver continuous product enhancements.
- Led the development of the initial version of the PlateRate Android app, focusing on intuitive UI design and smooth user experience.
- Built and maintained responsive front-end interfaces using HTML, CSS, JavaScript, and jQuery, significantly improving the platform's usability and visual appeal.
- Integrated MongoDB for backend data handling, designing efficient data models and queries to boost application performance and scalability.
- Gained practical experience with Git, actively contributing to code reviews and maintaining a clean, well-documented codebase.

User Interface Evaluator, NJIT (On Campus) | May 2016 - June 2016

- Executed thorough usability assessments for an oncology tool.
- Generated in-depth reports detailing its efficacy and user-friendly attributes.
